Jerrold Bushberg, clinical professor of radiology and director of Health Physics Programs, was elected as a fellow of the Health Physics Society, an honor limited to less than one-half of 1 percent of the society's members.

The society's Fellow Awards are intended to honor senior members who have made significant administrative, educational and/or scientific contributions to the profession of health physics.

The selections was made by the society's Awards Committee in recognition of his expertise on the biological effects and safety of ionizing and non-ionizing radiation.

Bushberg will be recognized for his selection at the society's annual scientific meeting in July in Indianapolis.

Jerrold Bushberg

Bushberg is a member of the main scientific council of the National Council on Radiation Protection and Measurement (NCRP), and is its senior vice president. He is a diplomate of the American Board of Science in Nuclear Medicine and the American Board of Medical Physics.
